OUR PLANET IS FACING AN AIR POLLUTION CRISIS

Live most polluted major city ranking

15:30 (Local time)

AQI* US legend

0-50	51-100	101-150	151-200	201-300	301+
Good	Moderate	Unhealthy for sensitive groups	Unhealthy	Very unhealthy	Hazardous

Rank	Major city, country/region	AQI* US	Followers
1	Baghdad, Iraq	167	98.4K followers
2	Kinshasa, Democratic Republic of the Congo	154	10.5K followers
3	Jakarta, Indonesia	153	1.8M followers

(IQAIR, 2025)

150.000+

PEOPLE FROM SUB URBAN MOVE INTO CITY EVERY YEAR IN THE WORLD (URBAN.CO)

89,9%

THE AVERAGE PERSON PRODUCES AROUND 20 KG OF CO_2 EVERY DAY. (WHO, 2025)

MOST PEOPLE REMAIN UNAWARE THEIR DAILY ACTIONS CONTRIBUTE TO GLOBAL WARMING

CONVENTIONAL SOLUTIONS FAIL TO ADDRESS THE ROOT CAUSE.

TREE-PLANTING PROGRAMS ARE OFTEN SEEN AS THE SYMBOL OF ENVIRONMENTAL CARE.

HOWEVER, TREES NEED 10–20 YEARS TO ABSORB SIGNIFICANT AMOUNTS OF CARBON.

40% PLANTED TREES DIE PREMATURELY DUE TO EXTREME CLIMATE CONDITIONS (WWF, 2025)

"PLANTING TREES IS GOOD BUT THE EARTH CAN'T WAIT FIVE YEARS FOR CLEAN AIR."

SANPAY

MEET PEOPLE BEHIND SANPAY

OUR TEAM COMBINES CREATIVITY, DATA, AND SUSTAINABILITY TO BUILD SOLUTIONS THAT MAKE EVERY TRANSACTION COUNT FOR THE PLANET.

SANPAY

“THE WORLD’S FIRST AI-POWERED CARBON WALLET WITH SMART CHIP TECHNOLOGY”

A single intelligent card connecting finance, lifestyle, and sustainability.

USE FOR :

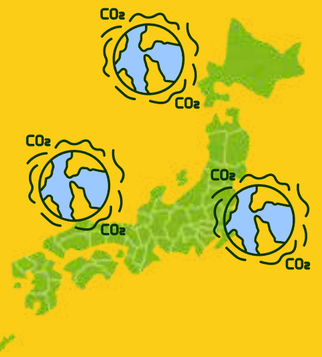

MAPPING EVERY TRANSACTION TO A GREENER PLANET – SANPAY'S GEOSPATIAL CARBON INTELLIGENCE

SANPAY USES GEO TECHNOLOGY TO TRACK LOCATIONS AND TRANSPORT, MEASURE CARBON FOOTPRINTS, AND GUIDE USERS TOWARD GREENER CHOICES.

GEO TECHNOLOGY ADDRESSES THE PROBLEM BY TRACKING USERS' LOCATIONS, TRANSPORT CHOICES, AND TRANSACTIONS TO MEASURE CARBON EMISSIONS IN REAL TIME.

THIS DATA LETS SANPAY IDENTIFY HIGH-EMISSION AREAS, SUGGEST GREENER ROUTES, AND PROMOTE LOW-CARBON MERCHANTS, HELPING USERS REDUCE THEIR PERSONAL AND REGIONAL CARBON FOOTPRINTS EFFECTIVELY.

OUR 3 MAIN GEO TECHNOLOGIES

REAL-TIME PUBLIC TRANSPORT LOAD BALANCING AND PUBLIC TRANSPORT

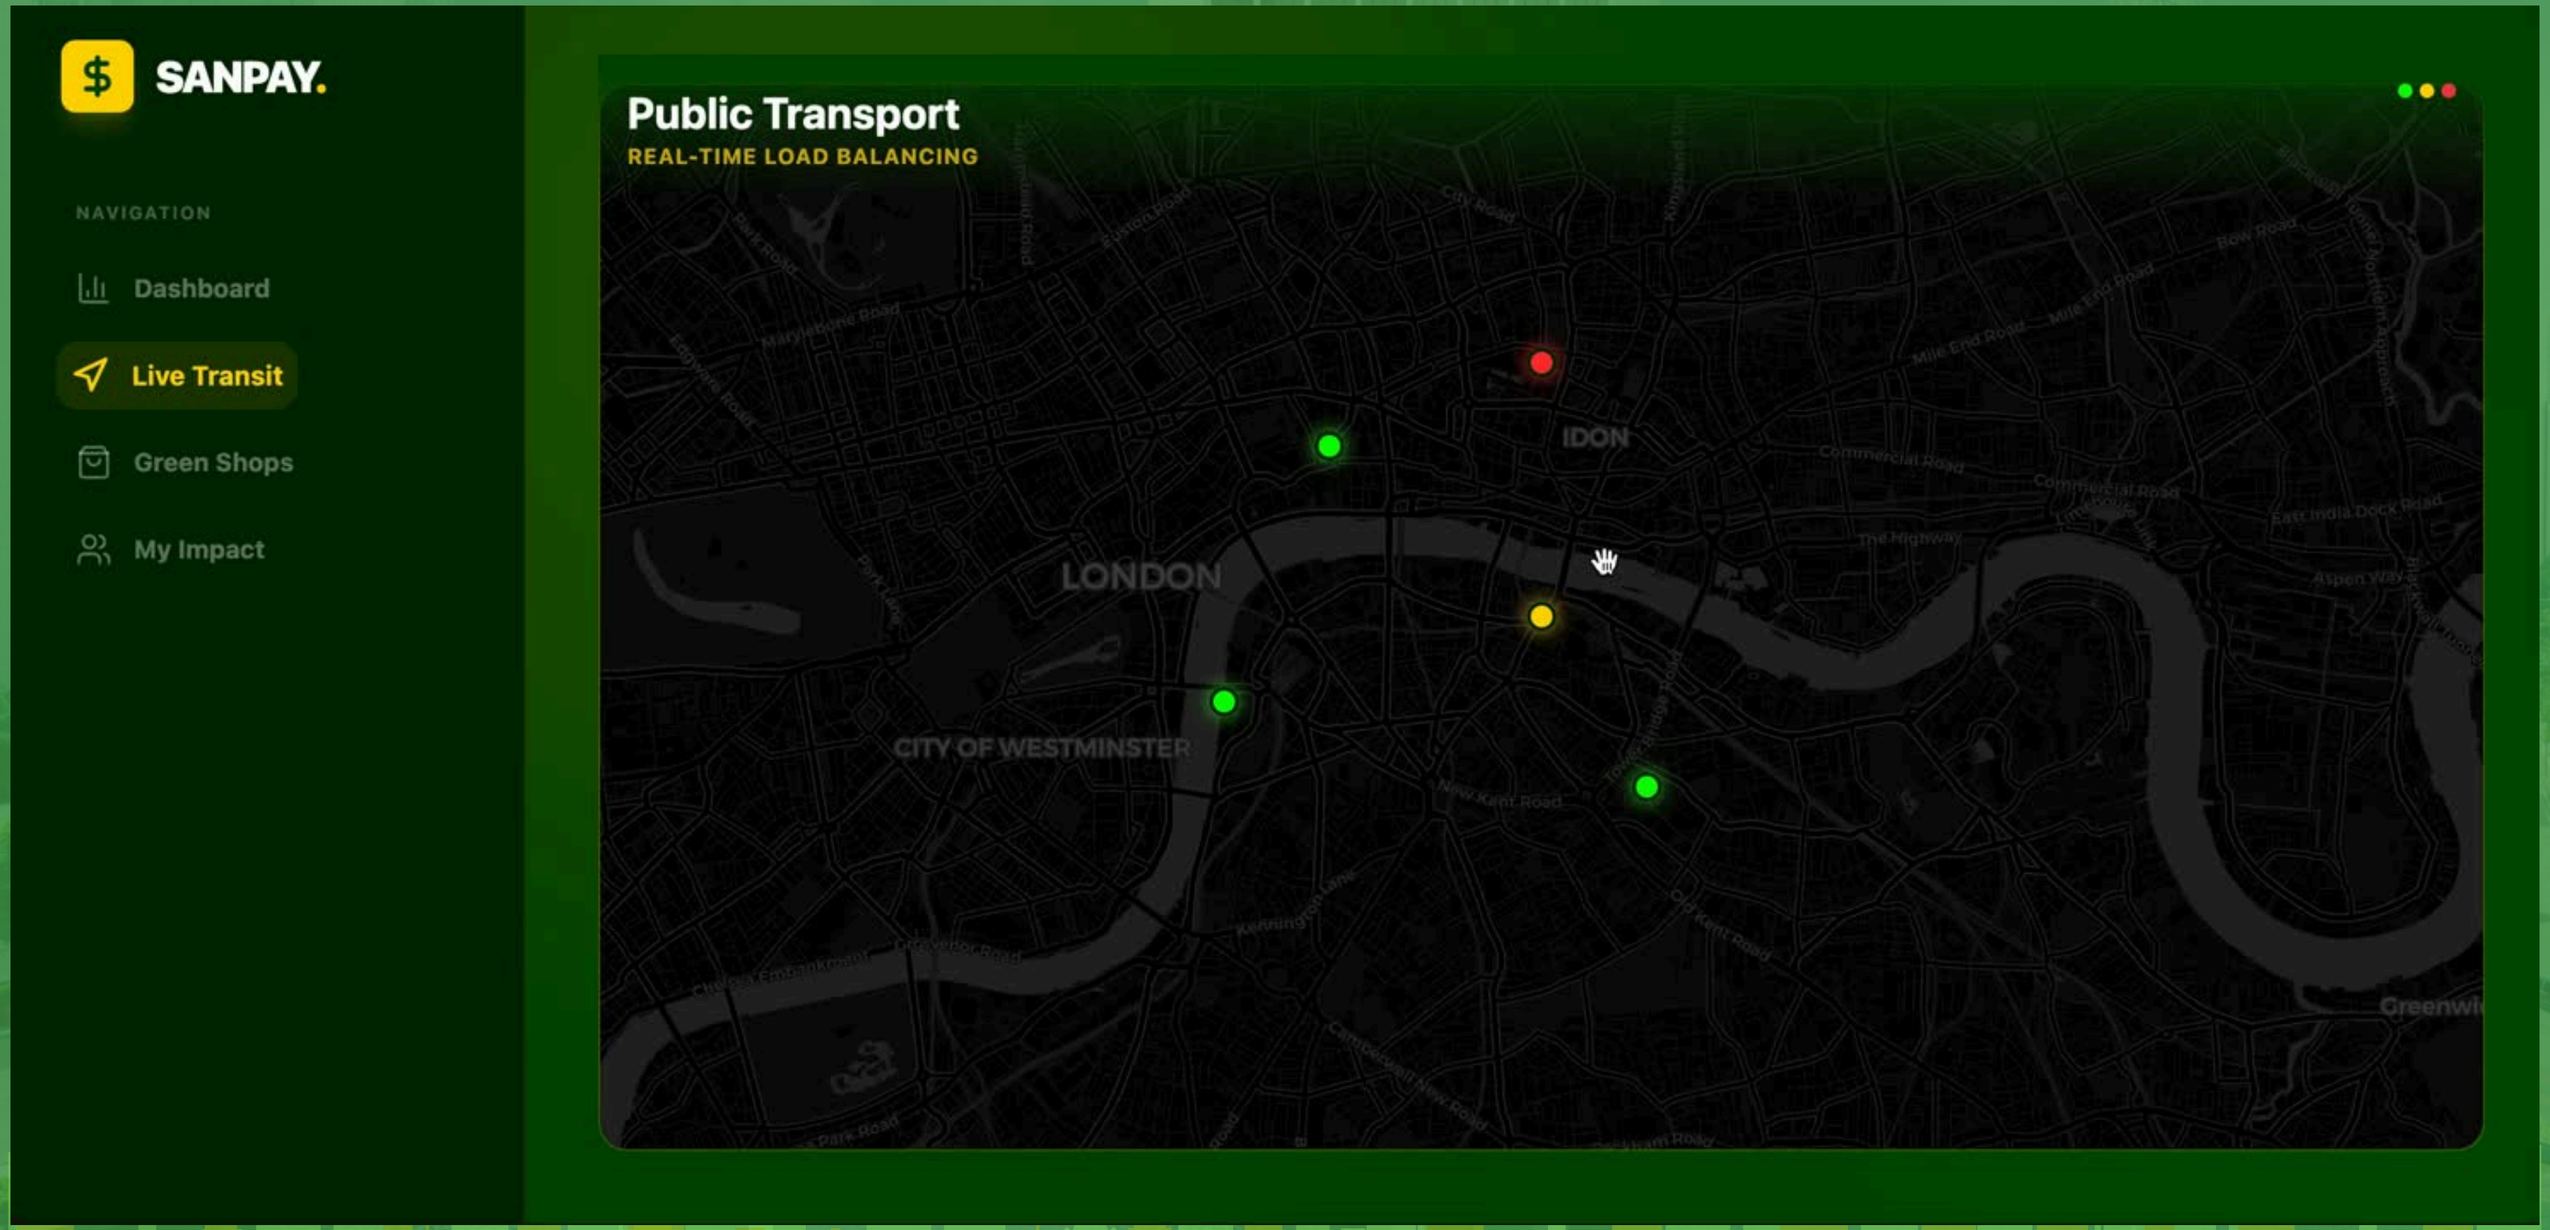

REAL-TIME GREEN MERCHANT QUEUE AND TRANSACTION LOCATION DATA

PERSONAL CARBON MAP DAN REGIONAL EMISSION DATA

GEO-POWERED INSIGHTS: TRACK, MEASURE, REDUCE CARBON INSTANTLY

THE FUTURE OF PAYMENTS – POWERED BY AI AND PURPOSE

1 SMART TRANSACTION DETECTION

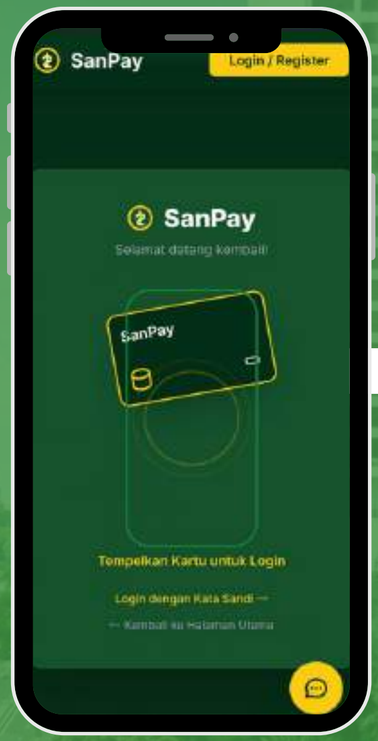

2 AI CARBON CALCULATION

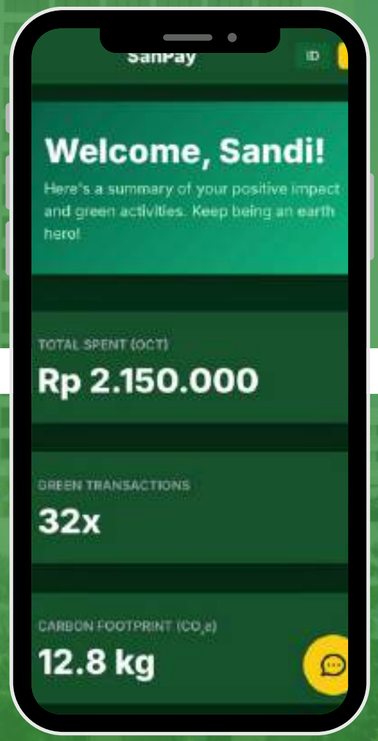

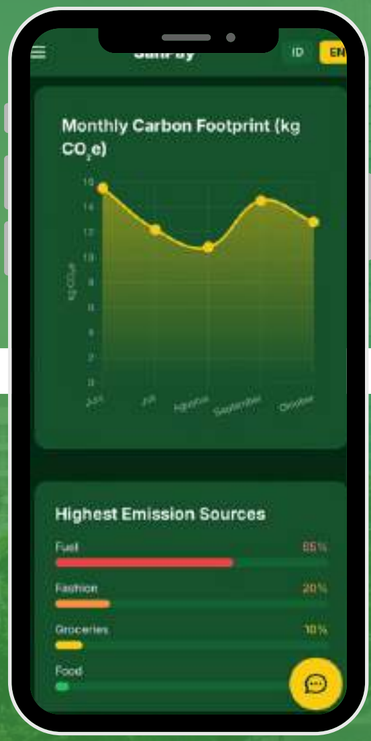

3 GREEN POINTS REDEMPTION

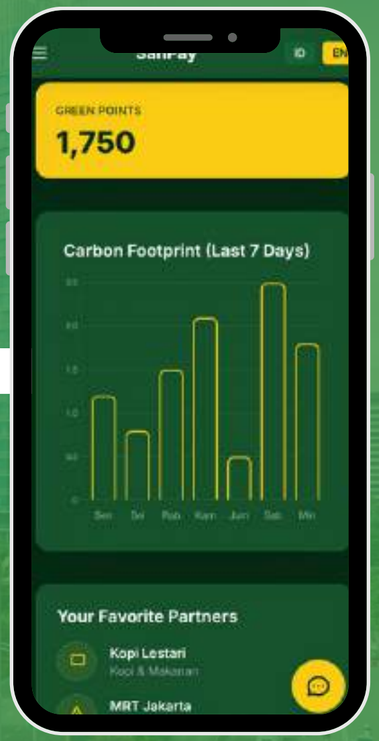

4 SUSTAINABLE IMPACT LOOP

"AT FIRST GLANCE, YOU MIGHT ASSUME WE PROFIT FROM CARD SALES BUT SANPAY'S VALUE RUNS FAR DEEPER THAN THAT."

THE FUTURE OF PAYMENTS – POWERED BY AI AND PURPOSE

"YOU MIGHT WONDER – IF THE CARD IS FREE, THEN WHERE DOES THE MONEY COME FROM???

"MONETIZING YOUR CLIMATE IMPACT IS A KEY"

THE FUTURE OF PAYMENTS – POWERED BY AI AND PURPOSE

USERS RECEIVE A FREE CARD AND USE IT FOR DAILY TRANSACTIONS, COLLECTING AS MANY GREEN POINTS AS POSSIBLE TO EARN REWARDS.

THE MORE PEOPLE ENGAGE IN ECO-FRIENDLY ACTIONS, THE GREATER THE POSITIVE ENVIRONMENTAL IMPACT INCREASING USERS' CARBON CREDITS.

THESE CARBON CREDITS ARE THEN SOLD ON THE VOLUNTARY CARBON MARKET AND TO THIRD PARTIES, GENERATING PROFIT FOR THE COMPANY.

THE VOLUNTARY CARBON MARKET (VCM) IS A PLATFORM WHERE BUSINESSES, INDIVIDUALS, AND ORGANIZATIONS VOLUNTARILY TRADE CARBON CREDITS TO OFFSET THEIR EMISSIONS. EACH CARBON CREDIT IS VALUED AT APPROXIMATELY $5 – $10

ECONOMIC OF SCALE ANALYSIS

ENGAGE IN THE VOLUNTARY CARBON MARKET BY ALLOWING INDIVIDUALS TO EARN AND TRADE CARBON CREDITS THROUGH DAILY TRANSACTIONS.

SELL CARBON CREDITS TO CORPORATIONS SEEKING TO OFFSET EMISSIONS OR ENHANCE THEIR CORPORATE SUSTAINABILITY PROGRAMS.

PARTNER WITH GOVERNMENT SECTORS AND PUBLIC TRANSPORT SYSTEMS—SUCH AS BUSES AND TRAINS—TO INTEGRATE CARBON TRACKING AND GREEN REWARDS.

ASSUMING A CARBON CREDIT VALUE OF $10 PER TON AND AN AVERAGE INDIVIDUAL GENERATING 30 KG OF CO_2 PER DAY, SANPAY HOLDS A REMARKABLE POTENTIAL TO CONVERT THESE DAILY EMISSIONS INTO MEASURABLE PROFIT.

Users	Carbon Credits Generated (tons CO_2/year)	Estimated Revenue (USD/year)
1,000 users	10,950 tons	$109,500
10,000 users	109,500 tons	$1,095,000
100,000 users	1,095,000 tons	$10,950,000
1,000,000 users	10,950,000 tons	$109,500,000

10,950,000 TONS OF CO_2 IS EQUIVALENT TO APPROXIMATELY:

2.4 MILLION CARS REMOVED FROM THE ROAD FOR A YEAR,

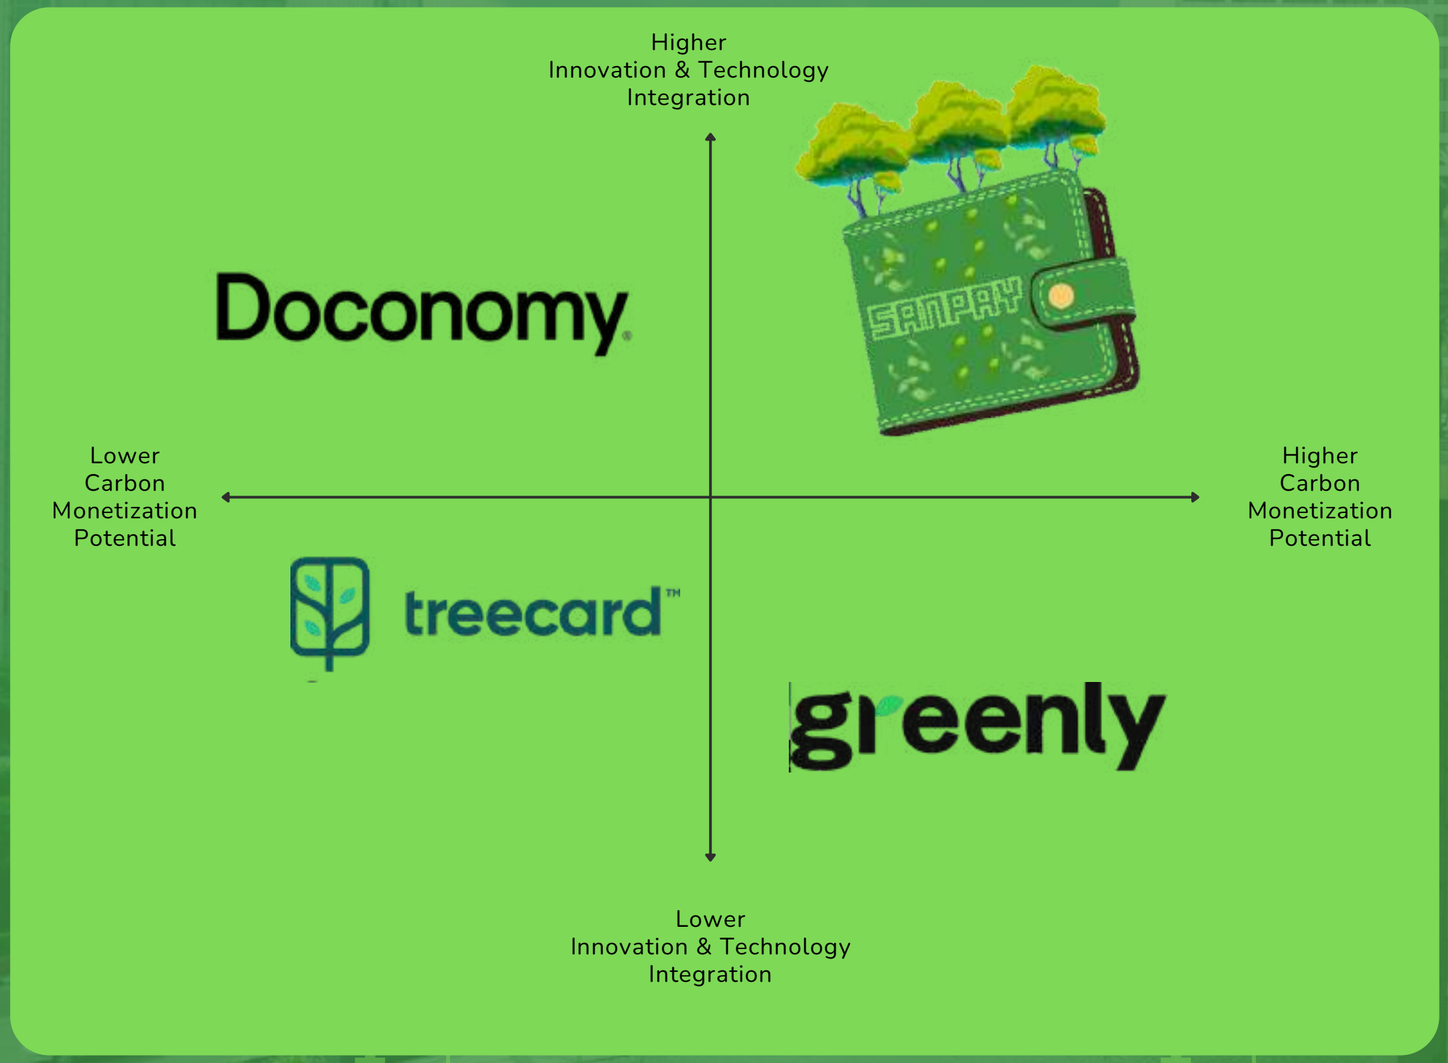

1.1 BILLION TREES ABSORBING CARBON FOR A YEAR

26 BILLION KILOWATT-HOURS OF ELECTRICITY SAVED ENOUGH TO POWER OVER 2.5 MILLION HOMES FOR ONE YEAR.

COMPETITOR POSITIONING MAP

SANPAY STANDS AT THE INTERSECTION OF FINTECH, SUSTAINABILITY, AND CARBON MARKETS — THE ONLY PLAYER THAT:

- INTEGRATES SMART CHIP + AI TECHNOLOGY TO TRACK REAL-TIME CO_2 EMISSIONS FROM PAYMENTS
- REWARDS USERS INSTANTLY THROUGH GREEN POINTS
- AGGREGATES AND SELLS VERIFIED CARBON CREDITS ON VOLUNTARY AND NATIONAL CARBON MARKETS
- ENABLES B2C, B2B, AND B2G SCALABILITY WITH STRONG ECONOMIC POTENTIAL

TRUSTED STANDARDS, STRONGER MARKET CONFIDENCE
